

Id	Test case
1	Verify that the website loads properly and all elements are displayed correctly
2	Test the search functionality by searching for different products and verify the results
3	Test the add to cart functionality by adding multiple products to the cart and verify the cart total
4	Test the checkout process by entering valid and invalid shipping and payment information
5	Test the account creation process by filling out the registration form with valid and invalid information
6	Test the login process by entering valid and invalid username and password combinations
7	Test the product filters by using various filter options and verify the results
8	Test the product sorting by using various sorting options and verify the results
9	Test the product reviews by adding a review for a product and verify that it is displayed correctly
10	Test the product ratings by giving a rating for a product and verify that it is displayed correctly
11	Test the wishlist functionality by adding multiple products to the wishlist and verify the wishlist total
12	Test the product comparison by comparing multiple products and verify the comparison results
13	Test the coupon code functionality by applying various valid and invalid coupon codes and verify the discounts applied
14	Test the product availability by adding a product to the cart and verifying that it is in stock
15	Test the product images by verifying that they are displayed properly and can be zoomed in and out
16	Test the product descriptions by verifying that they are complete and accurate
17	Test the product specifications by verifying that they are complete and accurate
18	Test the product availability notifications by signing up for notifications for out of stock products and verify the email notifications
19	Test the customer service chat functionality by initiating a chat with a customer service representative and verifying the response
20	Test the customer service email functionality by sending an email to customer service and verifying the response
21	Test the customer service phone functionality by calling customer service and verifying the response
22	Test the product return process by initiating a return for a product and verifying the return request
23	Test the product exchange process by initiating an exchange for a product and verifying the exchange request
24	Test the product refund process by initiating a refund for a product and verifying the refund request
25	Test the order tracking functionality by entering a valid order number and verifying the order status
26	Test the order history functionality by accessing the order history and verifying the past orders
27	Test the order cancellation process by canceling an order and verifying the cancellation confirmation
28	Test the product availability in different locations by searching for a product and verifying its availability in different locations
29	Test the shipping options by selecting different shipping options and verifying the estimated delivery dates
30	Test the shipping cost calculation by entering different shipping addresses and verifying the calculated shipping costs
31	Test the tax calculation by entering different billing and shipping addresses and verifying the calculated taxes
32	Test the order confirmation email by placing an order and verifying the order confirmation email
33	Test the order shipment email by placing an order and verifying the order shipment email
34	Test the order delivery email by placing an order and verifying the order delivery email
35	Test the mobile compatibility by accessing the website on various mobile devices and verifying the display and functionality

36	Test the responsive design by resizing the browser window and verifying the display and functionality
37	Test the SSL encryption by verifying the presence of the SSL certificate and checking the website for secure browsing
38	Test the security of the payment process by entering valid and invalid payment information and verifying the security measures in place
39	Test the cookie usage by verifying the presence of cookies and their usage on the website
40	Test the privacy policy by accessing the privacy policy and verifying the information provided
41	Test the terms and conditions
